

# Ecolab Hygiene Check

## Securing Your Hygiene Operations

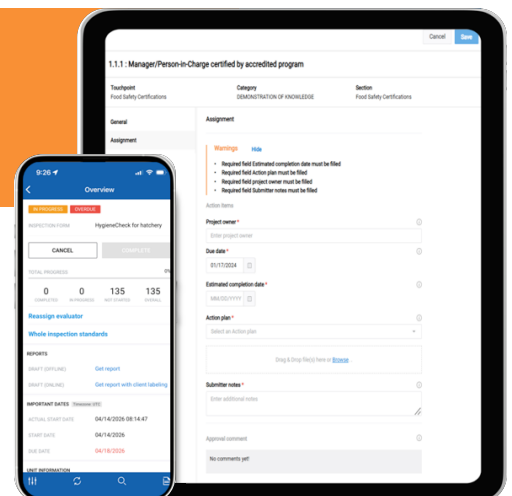

**Are you dealing every day with high disease pressure and ongoing sanitary challenges that directly impact productivity?**

Poultry and swine producers face gaps in biosecurity and hygiene, increasing the risk of outbreaks, losses and threat to people and farm performance.

To protect animals and results, producers need practical and reliable solutions that help keep disease under control.

## DISCOVER ECOLAB HYGIENE CHECK PROGRAM

A measurable, on-site specialist-led approach to optimize hygiene practices and improve operational efficiency in poultry, swine and hatchery environments to promote a more sustainable production.

# Ecolab Hygiene Check is based on:

## ON-SITE HYGIENE ASSESSMENT

Expert eyes on your operation for a practical improvement

## SMART METHODOLOGY

Hygiene assessment that identify and prioritise key challenges, validated by Ghent University experts

## TRAINING AND PERFORMANCE REVIEWS

On-site hygiene and biosecurity training is tailored to real needs

## How Ecolab Hygiene Check helps you:

### Optimize Hygiene Performance

Improve the hygiene standards across your sites with regular, specialist-led assessments that pinpoint risks and drive measurable improvement

### Monitor What Matters - Specialist Insights

Gain clear visibility of hygiene performance with digital scoring systems and validation tools to track progress, identify risks and make data-driven decisions

### Enhance Team Capabilities

Empower your team with practical hygiene and biosecurity training, boost team awareness, elevate daily practices and improve operational efficiency

## Make your hygiene operations more efficient and sustainable
